Hi Jaime,

Hope you are doing well!

As agreed, please verify our challenge for the Senior Data Engineer role.

Please back to us with your solution until **5th August**. This specific challenge has 7 days to complete it.

Please have in mind the bullet points that you are going to have in mind in the challenge review moment:

- Have in consideration the software development good practices!
- o Test are very welcome! E2E and unit tests are essential for us at least!
- o We will assess the code structure, organization and of course, quality. We enjoy a clean and well-organized code! 😊
- o Bear in mind the documentation, we will analyze your challenge and we want to understand the flow!

Please feel free to ask questions in case of need.

Notes:

- Please confirm that you have received this email
- When finished, send me the repository in public version or zip file so I can share it with our review team.

Thanks in advance and good luck 😊

Regards,

Diana Morais
